Weekly Delight
Photo handoff

22 October 2026 · Prepared for Claude and the owner

226 reviewed real photos

220 starting gaps filled and 6 existing heroes replaced. Sources: Wikimedia Commons 90, Pexels 83, Flickr 26, Pixabay 25, Stockvault 1, StockSnap 1. Every selected photo has individual source/licence evidence, a reviewed crop and creator credit.

No merge or deployment. Changes are on the review branch. Recipe URLs, design, ads and monetization are preserved. Generated pages and meaningful dates remain for Claude’s reviewed integration build.

Open docs/extended-recipe-photos-2026-10-22/CLAUDE-HANDOFF.md on that branch for the complete report, exact evidence, previews and CSVs. The later documentation commit does not change the verified photo source.

Catalogue after integration build

5,515 recipes: 4,726 with photographic heroes; 101 with legacy illustration heroes; 688 without a hero. Sliders has a preparation photo, so 687 have no picture in either slot. All 483 original process-image records and asset pairs are preserved.

Corrections to existing photos

Chicken noodle soup: creator explicitly labelled the old image AI-generated; replaced with a real-camera photograph.

Persian lentil rice: old source explicitly says beef despite Vegetarian/Vegan labels; withdrawn. New candidates with unestablished toppings remain held.

Sliders and brisket: old pre-cooking/browning photos retained as process shots. Brisket has a new finished hero; sliders still needs one.

Closer replacements: cinnamon-sugar waffles, plain skin-on chicken thighs, witch-finger cookies and Egyptian rice showing toasted vermicelli.

Search and evidence limits

All 906 starting gaps have URL-level outcomes. Reviewed 3,378 staged thumbnails and all 405 processed full-size candidates; 8 processing refusals were not overridden. A further 52 full-size candidates remain held for source details. Two additional targeted Persian photos were also held. Six libraries supplied selected photos; further available libraries and original-source chains were searched.

Flickr and StockSnap controls failed before all planned searches finished. Other sources returned access errors or required credentials. These limits remain explicit in search-summary.csv. A bounded empty result does not mean no suitable photo exists. This search does not claim to exhaust the internet.

Stock photos illustrate dishes; they do not establish exact hidden ingredients, cross-contamination, appliance use, safe cooking or personal testing. Cut, garnish and serving differences are disclosed in selected.csv and the preview gallery.

Independent Claude review

Reviewed all 233 merged photos and checked every primary licence/creator. Saved live checks found 233 recipe pages and 233 WebPs responding HTTP 200 with base-matching files, correct canonicals and one primary Recipe entity. Those observations apply to the published base, not this unpublished branch. They do not establish Google indexing.

Verification passed

Full build/check: 5,875 HTML pages, 5,871 sitemap URLs and 5,515 search records. Browser: 32 desktop/mobile cases, 442 checks, zero failures. Image inventory: no missing, unused or broken references. Advertising unchanged against both the base and ac8dbc13.

Exactly 228 recipe date/hash records and 106 collection/info records change; no unrelated recipe dates move. Second build changes zero output/date/hash records. All selected recipe fingerprints match the reviewed snapshot. Existing 15 source-duplicate groups and 6 identical-byte groups remain documented; no new exact-source/byte duplicates were introduced.

Claude: four content questions

1. chocolate-pots: unqualified raw yolks, no subsequent safe custard temperature. details56/01-ice-cream-fudge-and-no-bake-a.js:27.

2. panettone-bread-pudding: Gluten-Free label with ordinary panettone. catalog-50.js:81; details50/03-british-bakes-portuguese-and-spanish.js:21.

3. slow-cooker-beef-ragu: Gluten-Free label with ordinary pappardelle. catalog-50.js:116; details50/04-spanish-french-and-sauces.js:368.

4. nutella-cookies: Dairy-Free label with ordinary Nutella containing milk powder. catalog-55.js:93; details55/03-lemon-nutella-oat-and-peanut-butter.js:449.

Codex did not edit these content files. Resolve claims using supported ingredients/guidance, then follow up the diet recognizer separately. Photographs are not evidence that a recipe is safe.

Claude: integration checklist

Review source commit and photo variations; compare recipe fingerprints with current content. Preserve process photos and monetization. Integrate on a separate branch, regenerate missing/readme/credits and public output, run build/check, rebuild for stability, verify meaningful dates and ads. Keep draft PR #21 separate; preserve main’s corrected ad-slot counter.

Obtain owner approval before merge/deployment. After approved deployment check representative live pages, images, credits, canonicals, robots/schema, sitemaps and ad delivery. Google Rich Results Test and Search Console are separate checks. Technical/photo improvements cannot force indexing or guarantee traffic.
